

# JET FOAM 9002

## FOAMING AGENT

### GENERAL DESCRIPTION

JET FOAM 9002 is formulated for use as a foaming agent in gas well systems.

Normal precautions for chemicals apply to this product. See MSDS for specific instructions.

### APPLICATION

JET FOAM 9002 is recommended for use in gas wells that produce water in sufficient quantities to load up and "kill" the well. Chemical injection rates will be optimized as a result the presence of hydrocarbons.

### TYPICAL PHYSICAL PROPERTIES

Specific Gravity	1.07
Pour point	32 <sup>o</sup> F
Solubility, water	Soluble
Solubility, oil	Insoluble
Appearance	Clear
Physical form	Clear/Light

JET FOAM 9002 can be applied continuously through a capillary string or down the backside of wells where there is a not a packer.

### AVAILABILITY

JET FOAM 9002 is available in 55 gallon drums or five (5) gallon pails from Chemject International.

Chemical selection is based upon the chloride content of the water and/or presence of hydrocarbons. Foam tests conducted in the lab will identify the foamer best suited for a specific application.
