

# JET SCALE 4608

## PHOSPHONATE SCALE INHIBITOR

### GENERAL DESCRIPTION

A phosphonate based scale inhibitor that is very efficient in the presence of high levels of calcium. Very calcium tolerant.

Prevents calcium and barium scales from forming in water disposal, water injection, producing oil wells and gas wells.

### HANDLING

Contains no hazardous solvents. Corrosive Liquid. Use with caution. See MSDS sheet for specific information.

This product is shipped in new plastic drums. Extreme hot or cold storage temperatures should be avoided.

### APPLICATION

Can be applied successfully utilizing several different methods. Excellent for squeeze applications using the absorption and desorption method. Protection is obtained down to 1.5 to 2 ppm. residual in the produced fluids. Continuous addition into disposal and injection waters is very successful. Can be utilized in phosphate precipitation applications.

Provides excellent protection under high temperature, high pressure applications such as in Unidraulic pumping systems (Jet Pumps).

### TYPICAL PHYSICAL PROPERTIES

Appearance	Amber
Odor	Pungent
Specific Gravity, 60°F. (16°C)	1.09
Weight, lbs. /gal.	9.08
Flash point, °F. TCC	>200
Boiling Point, °F	212
Pour point	N/D
PH	<2.0
Solubility in Water	Yes

### AVAILABILITY

Jet Scale 4608 is available in bulk, 55 gallon drums and 5 gallon pails.
